## GENERAL SAFETY PRECAUTIONS

●When using it, you should notice the circuit electric voltage **MUST** match the electric voltage on the label, (allowing electric voltage deviates $\pm 5\%$ )

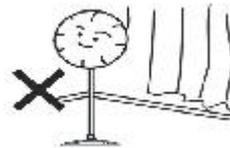

●If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

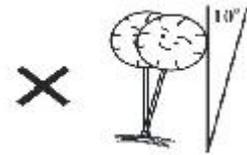

●Must not hang anything on the guard

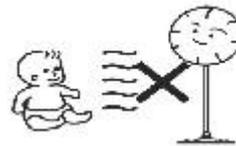

●Ensure the curtain will not be winded in the fan

●The ground fan should be placed on the steady ground, and the surroundings have no other things

●Advise babies, the old not to face the fan for a long time, to avoid the cold

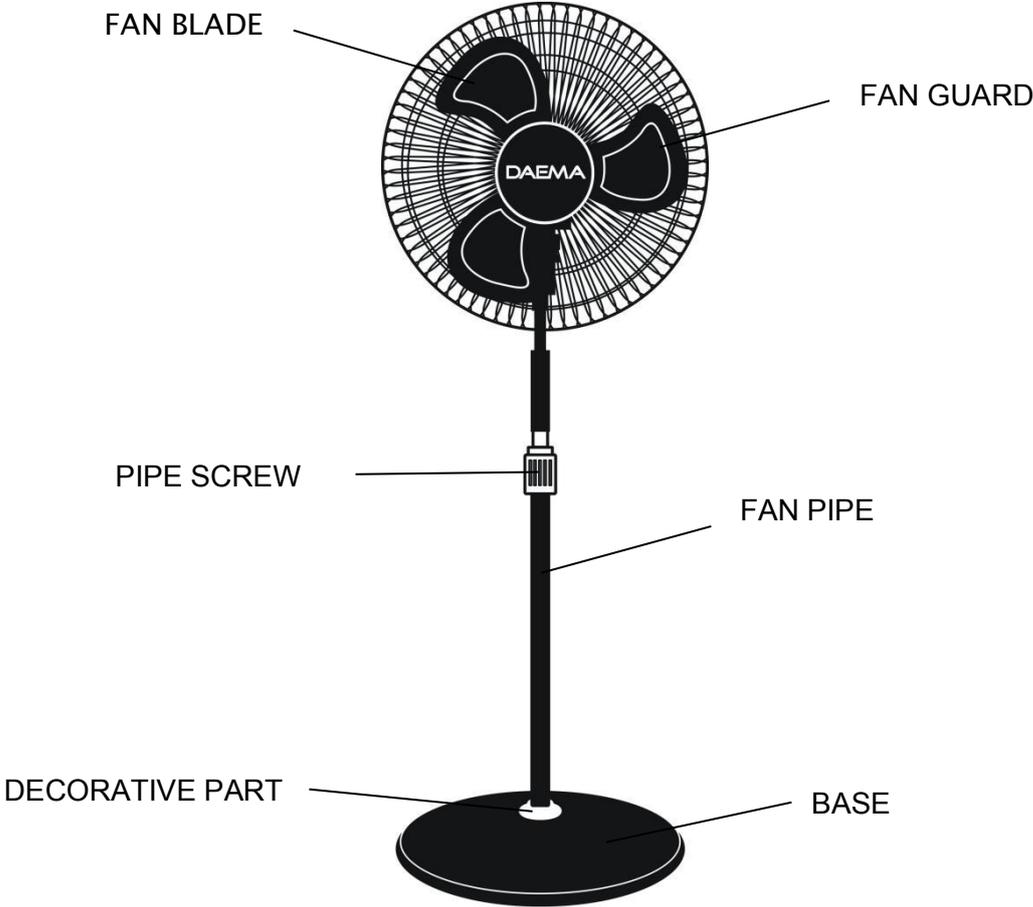

●Don't insert finger or anything into the guard when operation

●This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance

●Do not use gasoline, paint thinner or other chemicals to clean the fan.

**PART IDENTIFICATION**

**SPECIFICATIONS**

Model	<b>DFS-120FL</b>
Rated Voltage	<b>220-240V~</b>
Rated Wattage	<b>155W</b>
Frequency	<b>50Hz</b>

## OPERATION INSTRUCTION

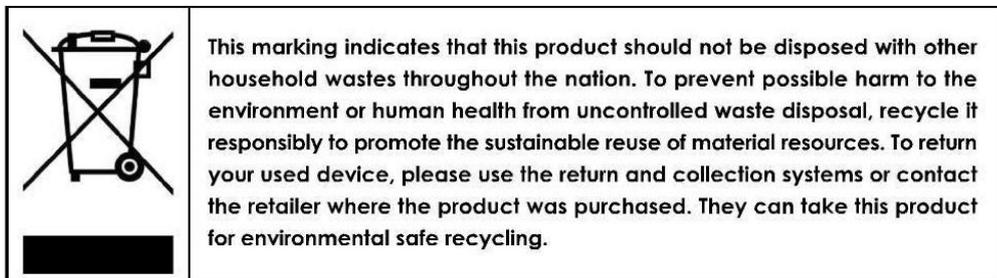

- ◆ Set your fan on a level dry surface
- ◆ Plug the power cord into 220-240V volley AC wall outlet.
- ◆ Your high velocity fan features 4 speeds designed to give you maximum flexibility and to meet all your air circulation requirements low or med speed setting can be used for most of your needs. However when you want to have maximum air movement, use the high setting. Select the desired speed for your needs by using the rotary control switch.
- ◆ Adjust to your desired air stream by tilling the fan assembly to the require position.

## TROUBLE-SHOOTING
